EDUCATION

Candidate for Master of Science in Data Science and Business Analytics

Expected May 2027

University of North Carolina at Charlotte; Charlotte, NC

4.0/4.0 GPA

- *Relevant Coursework: Advanced Business Analytics, Database Systems for Data Scientists, Visual Analytics and Storytelling, Applied Machine Learning*

Bachelor of Arts in Mathematics

May 2023

University of North Carolina at Asheville; Asheville, NC

Honors: William and Ida Friday Award for Community Service; Outstanding Service and Leadership Award; Collaboration Award

Roles: President of Prospanica; AVID Tutor Leader; Secretary of Society of Physics Students

TECHNICAL SKILLS

Programming & Databases: Python (NumPy, Pandas, Scikit-learn, Streamlit, PyTorch), R, SQL/NoSQL databases, Snowflake

Machine Learning/AI: Linear/Logistic Regression, Random Forests, XGBoost, kNN, k-means clustering, Deep Learning

BI & Visualization: PowerBI, Tableau, Google Data Studio, Matplotlib, Seaborn, Plotly

Additional Tools: Microsoft Excel (Pivot Tables, VLOOKUP, VBA), Git/Github, Microsoft Office Suite

EXPERIENCE

The University of North Carolina at Charlotte; Charlotte, NC

PhD Research Assistant, School of Data Science

May 2026 — Present

- Built Data Studio dashboards tracking KPIs across 1,000+ records, delivering data-driven insights to research stakeholders.
- Analyzed 1,000+ Reddit posts in Python, identifying behavioral trends using a custom qualitative-analysis framework.
- Engineered a Python/OAuth backup pipeline integrating the Google Sheets API to sync coding data across devices.

Graduate Teaching Assistant, Modeling and Society II (Data Science)

Jan 2026 — May 2026

- Analyzed performance data for 90+ students in Power BI, identifying trends to redesign workshops and improve outcomes.
- Taught Python-based data analysis, regression, and classification modeling to 90+ students in collaborative workshops.
- Delivered detailed feedback on 270+ projects and coding assignments, strengthening students' data communication skills.

Academic Advisor for Data Analytics, Software Development, Computer Science

Jan 2024 — Jan 2025

Central Piedmont Community College; Charlotte, NC

- Built Notion dashboards tracking 700+ student records, supporting data-driven advising decisions for 800+ students.
- Collaborated with advising teams to identify trends in student data, contributing to a 19% enrollment increase.
- Maintained CRM systems documenting 800+ students' data in FERPA compliance, standardizing reporting team-wide.

Private Mathematics & Data Science Tutor

Aug 2019 — Present

Math with Monica; Charlotte, NC

- Analyzed individual student performance data to design targeted curriculum, raising grades by 15–40%.
- Presented data-driven progress reports to students and parents, translating results into clear recommendations.
- Designed a stats-to-ML curriculum applying quantitative methods (regression, k-means, decision trees) to 3 students weekly.

PROJECTS

Asheville Airbnb Market Analysis: The Host Matters More Than The Home

Spring 2026

- Built a Random Forest model ($R^2=0.842$, scikit-learn) identifying host pricing as the top driver of occupancy trends.
- Analyzed 642K+ reviews using VADER sentiment and LDA topic modeling to surface guest insights and market patterns.
- Forecasted booking trends with SARIMA time-series modeling, informing seasonal pricing and demand recommendations.

Zerve AI From Events to Outcomes Datathon

Spring 2026

- Built Random Forest and XGBoost models in Python (scikit-learn), achieving 93% accuracy predicting event outcomes.
- Led a 4-person team through data cleaning, feature engineering, and model evaluation, presenting insights to stakeholders.

From Arrests to Detainments: Evaluating ICE Enforcement Outcomes

Spring 2026

- Visualized 1M+ enforcement records in Power BI and Plotly, surfacing trends and patterns by year, state, and severity.

NYC Rideshare: Data-Driven Strategies for Uber

Fall 2025

- Built a logistic regression model (statsmodels) on 2019–24 Uber data to identify key drivers behind consumer choice trends.
- Applied k-means clustering to define 3 customer personas, presenting data-driven recommendations to business stakeholders.
